

# Tamara Vandebroeck,

## Front-End developer.

## ABOUT ME.

I love coding stuff for the web!  
9+ years of experience in designing, building, and maintaining responsive websites, both in a company and as a freelancer. I recently completed a one-year training program focused on JavaScript and React to deepen my front-end development skills. My goal: to craft visually appealing, pixel-perfect UIs, accessible web applications that engage and inspire.

Concerts & Festivals

## PROJECTS.

Plan My Trip

LIVE

Travel planning application developed in React. It lets you create activities by trip and organize them by day using drag and drop.

Carbon Quest

LIVE

Carbon Quest is a collaborative project realized in 3 days. It's an educational platform game that invites you to explore the challenges of Green IT.

Shake 'n Taste

LIVE

Shake & Taste is a web app that lets users search for cocktails using TheCocktailDB API. It features a light/dark mode and an interactive lab to create custom mixes.

Mastermind

LIVE

Built the Mastermind game in JavaScript with logic for validating guesses and an interactive interface.

## HARD SKILLS.
